

SUPERFORM™

Your API Journey starts here

Accelerate drug development with our innovative APIs
and tailored chemical synthesis expertise

Current Pharmaceutical Industry Landscape

The pharmaceutical landscape is rapidly shifting toward personalized medicine and complex molecules, demanding absolute supply chain resilience. Value creation is now dictated by precision API synthesis and chemical innovation, moving specialty chemicals to the industry's forefront. Navigating soaring demand for custom solutions, sterile manufacturing, and advanced excipients requires more than a supplier; it demands an integrated partner. We provide the integrated R&D, stringent quality control, and flexible capacity that turn complex chemical challenges into definitive market advantages to accelerate your time-to-market and ensure uncompromised patient care.

Key Challenges

- | | | |
|---|---|--|
| 1 | Fragmented sourcing & inconsistent supply chains | Sourcing raw materials from multiple suppliers often leads to instability, logistics bottlenecks, production disruptions, and delayed timelines. |
| 2 | Risk of non-compliance & stringent safety standards | Any lapse in compliance can trigger regulatory action, legal penalties, and delayed approvals. Only a limited number of suppliers can consistently meet evolving global safety and environmental requirements. |
| 3 | Need for faster innovation & customization | As modern medicines grow more complex, standard catalogue chemistries fall short, driving the need for partners who can deliver custom synthesis, collaborative development, and faster time to market. |
| 4 | Quality discrepancies batch after batch | Maintaining batch-to-batch purity and consistency becomes challenging when working with multiple vendors, increasing the risk of compromised product performance and reliability. |
| 5 | IP Control & Ownership ambiguity | Co-development of new APIs can create uncertainty around intellectual property, threatening exclusivity and long-term value. Clear IP frameworks from the outset are now essential when selecting specialty chemistry partners. |
| 6 | Inability of suppliers to offer technical & scale-up support | Many suppliers lack integrated R&D, engineering expertise, and process understanding, limiting their ability to scale from pilot to commercial production and leading to delays, opportunity loss, and higher manufacturing costs. |

About SUPERFORM

SUPERFORM is a pioneering specialty chemistry company with a fresh perspective. While manufacturing is at the core of our expertise, what truly distinguishes us is our mastery of complex chemistries, our problem-solving acumen, and our commitment to creating meaningful impact for our customers, partners, employees, and the world.

Manufacturing Competencies & Scale

Chemistries:
Cyanation

Throughput:
2500 TPA

Location:
**Derra Bassi,
Punjab**

Fully compliant with
**FSSAI, FDA (GRAS),
and EFSA standards**

Certifications:
**ISO 9001, ISO
14001, DML**

The SUPERFORM Advantage

Performance

We promise chemistry that prioritizes patient safety and meets the highest regulatory standards.

Scale & Consistency

Our infrastructure supports high-volume delivery and maintains consistent quality, even as market demand shifts or accelerates.

Solutions Partner

We work with your team to accelerate development, adapt to new requirements, and keep your projects moving.

Expertise of Handling Complex Chemistries

We own our supply chain end-to-end, giving customers traceability, control, and confidence at every step.

Backwards & forwards integration

With over 5 decades of know-how, robust R&D programs, and domain knowledge that's market tested & future ready.

Hero Chemistries (Phosphorus, Sulphur & Zinc Chemistries)

In Pharmaceuticals, control matters. Control over purity, processes, and sourcing. We own every step of the process, right from raw material to end-product. That means no reliance on third party supply chains, complete visibility, and promise of assured quality. SUPERFORM gives its customers something that others can't. Confidence. Confidence that we'll deliver what we say, when we say it. Confidence that, our customers can count on us, no matter what.

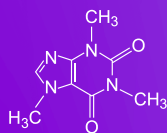

SUPERFORM supplies high-grade chemistries for antibiotics, antifungals, antiretrovirals, and analgesics.

Focus Area

Our key focus areas are APIs, Solvents & Reaction Agents, Catalysts, Specialty Polymers, Stabilizers & Preservatives, Buffers & pH Adjusters, Coatings & Films Forming Agents.

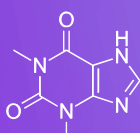

Our Product Portfolio

1

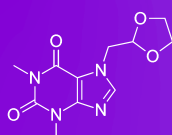

Caffeine Anhydrous

2

Theophylline

3

Doxofylline

Change chemistry.
Change everything.

SUPERFORM™

Change chemistry.™
Change everything.
